Complete ECSRS Sprint 1

This sprint contains **2 completed work items** and **4 open work items**.

- Completed work items includes everything in the last column on the board, [Done](#)
- Open work items includes everything from any other column on the board. Move these to a new sprint or the backlog.

Burndown Chart

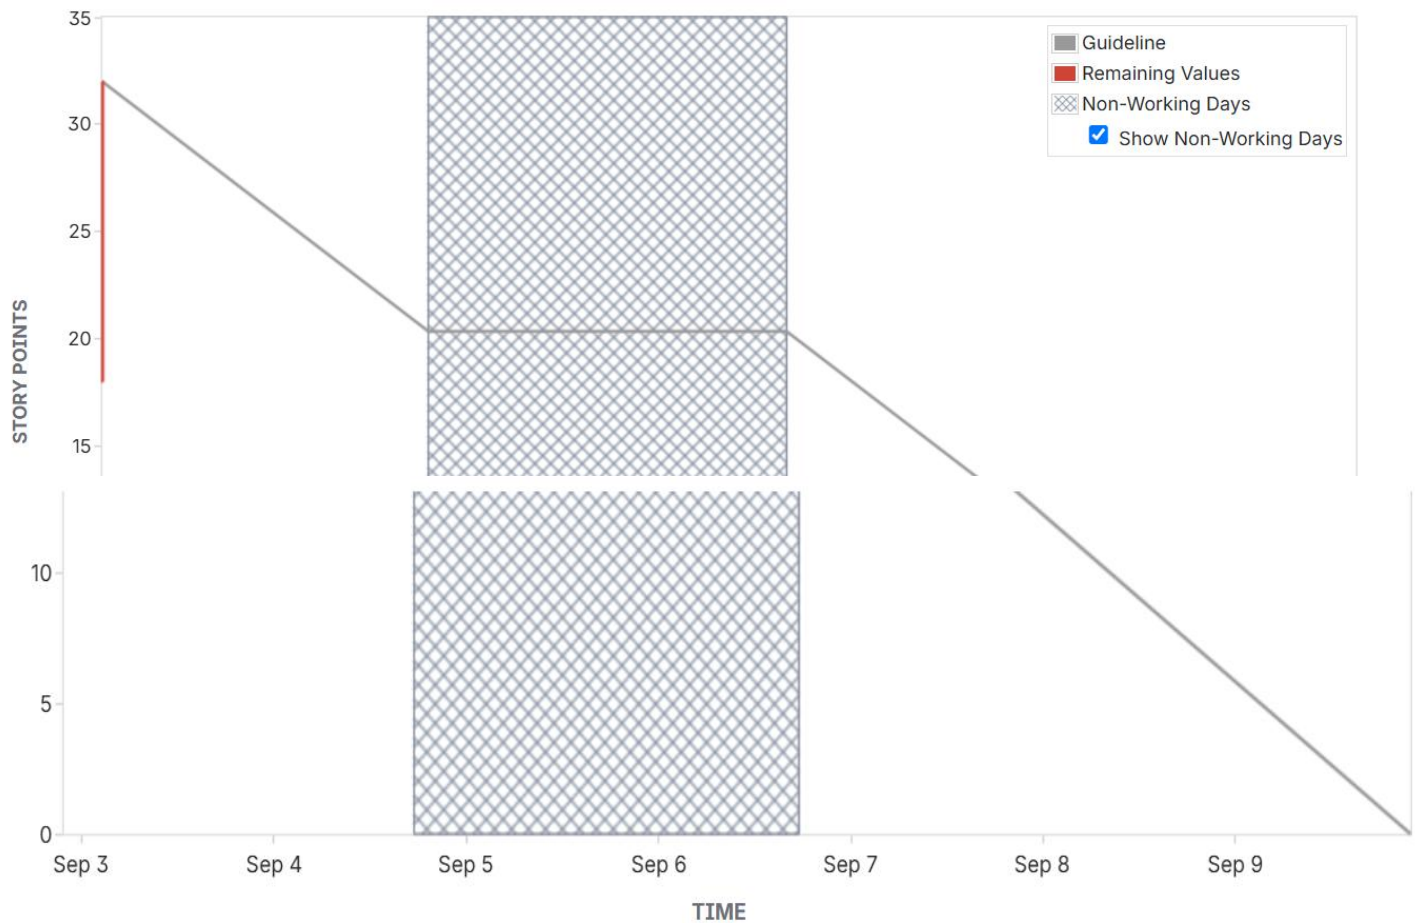

[How to read this chart](#)

ECSRS Sprint 1 Story Points

Implement core EV charging station discovery and reservation functionality.

1. Did your estimations reflect the actual effort?

Yes, the estimations were mostly close to the actual effort. Some tasks required additional time because of configuration, understanding Jira, and implementing the charging station features. Overall, the estimates helped us plan the sprint effectively.

2. Was your backlog well-prioritized?

Yes, the backlog was prioritized according to the importance of the EV charging station system. Core features such as finding compatible charging stations, viewing available chargers, and reserving a charging slot were given higher priority.

3. How did your simulated sprint align with your plan?

The simulated sprint followed the planned workflow. The tasks were moved through **To Do → In Progress → Done**, and the important charging station discovery and reservation tasks were completed as planned. The Jira board helped track the progress of each task.

4. What insights did the burndown chart give about your team's capacity?

The burndown chart showed how the remaining story points decreased during the sprint. It helped us understand the team's progress and workload. The chart also showed that the team was able to complete the planned work progressively and identify remaining tasks during the sprint.
